Today's topic,

Read the following:

Cardinal and ordinal numbers

Read what these people are talking about.

How many children took part in the cycling race?

There were **one hundred and nine** students in all.

That is a big number!

Yes, but **twenty** children dropped out in the middle of the race.

Who won the race?

Stuti from Green Field School stood **first**, and Akhil from our school came **second**.

Number words like **one**, **two**, and **three** are called **cardinal numbers**.

We use ordinal numbers to tell where something or someone is in a series, line, or group.

Number words like **first**, **second**, and **last** are called **ordinal numbers**.

In the dialogue you just read—

- **one hundred and nine** and **twenty** are **cardinal** numbers.
- **first** and **second** are **ordinal** numbers.

Remember

- We say **and** between the hundreds and the rest of the numbers. For example—
 - one hundred **and** nine
- When you use ordinal and cardinal numbers together, always use the ordinal first, as in this sentence.
 - The **first two** rows are for special guests.
